

# SecuroPlus Drainage

## Fluted Low-Vacuum Drainage System

The drainage tubing is constructed with four lateral channels to increase drainage efficiency. Tissue friendly silicone material and specific construction provide reliable drainage flow even when single channels are obstructed.

SecuroPlus fluted low-vacuum drainage

above: conventional drainage - 50% remaining drainage performance  
below: fluted drainage - 87,5% remaining drainage performance

### FEATURES:

- Seven times larger tissue contact than regular perforated drains
- Significantly enhanced drainage performance
- Multiple drainage routes to avoid clogging
- The channel design offers a nearly pain-free drainage removal

### SecuroPlus Drainage

Description	Ref.No.	Size	Total Length	Fluted Length	Packing Unit
flat drainage, 3/4 fluted, with trocar	01.5307	7 mm	110 cm	21 cm	15 ea/box
	01.5310	10 mm	110 cm	21 cm	15 ea/box
flat drainage, 4/4 fluted, with trocar	01.5407	7 mm	100 cm	20 cm	15 ea/box
	01.5410	10 mm	100 cm	20 cm	15 ea/box

### SecuroPlus Round Drain

Description	Ref.No.	Size	Total Length	Fluted Length	Packing Unit
round drainage, fluted, with trocar and adapter	01.5510	10 F	110 cm	20 cm	15 ea/box
	01.5515	15 F	120 cm	30 cm	15 ea/box
	01.5519	19 F	120 cm	30 cm	10 ea/box
round drainage, fluted, with adapter	01.5524	24 F	120 cm	30 cm	10 ea/box

STERILE EO LATEX-FREE

### SPECIFICATIONS:

- Material:
  - Drain:..... Silicone, radiopaque
  - Trocar:..... Stainless steel
- Packaging:..... Double packed, sterile
